

Disaster Relief

What We Do:

- Help families return to safe, sanitary, and secure housing.
- Assist in providing financial assistance related to the recovery plan. The Disaster Case Management Program helps survivors come up with a recovery plan and connects them with available resources to be successful.
- Assist survivors with identifying and verifying the household's disaster recovery plan.
- Advocate for the family when necessary, to obtain services from available resources.
- Assist in providing construction resources in relation to the construction needs of the recovery plan. All construction assistance will be analyzed to ensure it is aligned with the long-term recovery plan.

The Disaster Case Management program (DCMP) assists survivors in creating a recovery plan while reconnecting them with available resources for an achievable and successful recovery, while following COVID-19 guidelines outlined by state and local authorities.

How We Can Help:

- Immediate Food Assistance
- Rental Assistance
- Temporary Housing
- Clothing Assistance
- Long Term Assistance
- Access and Functional Needs Assistance
